Why Managed Lanes?

A managed lanes concept is generally a “freeway-within-a-freeway” where a set of lanes within the freeway is separated from the general use lanes.

In support of the FDOT’s vision of providing a safe and congestion free transportation network, it is the policy of the Department to employ managed lanes on appropriate facilities that currently, or are expected in the future, to experience significant congestion.

Provide travel choices

Offer predictable travel times

Manage time congestion

Reduce fuel consumption

Decrease air pollution

Support transit usage

FY 2023 Annual Listing of Obligated Projects

Both 23 USC §134 and §339.175, Florida Statutes, mandate that Metropolitan Planning Organizations (MPO) publish the annual listing of projects for which federal funds have been obligated in the preceding year. 23 CFR §450.334 further stipulates that the listing shall identify for each project the amount of Federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the Federal funding remaining and available for subsequent years.

The Palm Beach TPA created the attached summary listing of projects where total Federal funding requested in the TIP differed from the Federal funding that was obligated by at least \$500,000.

In general, federal funds are obligated to transportation projects through the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). According to FHWA definition, an obligation is a legal commitment: the Federal government's promise to pay a State for the Federal share of a project's eligible cost. For a project funded by FHWA funds, this commitment occurs when FHWA approves the project and executes the project agreement. For a project funded by FTA funds, this commitment occurs at the time the FTA grant is awarded. Alternatively, funding can also be "de-obligated". A de-obligation means money previously obligated is removed from the project to reflect changes to the project cost, delay, or cancellation.

Below is a summary table showing the amount of funds programmed in the TPA’s Transportation Improvement Program (TIP) for Fiscal Year 2023, the amount obligated for Fiscal Year 2023, the difference, and the amount de-obligated.

PEDESTRIAN & BICYCLE QUARTERLY CRASH REPORT

QUARTER

2

2023

Quarter 2 (Q2) Crash Analysis

The Palm Beach Transportation Planning Agency (TPA) has adopted Vision Zero – a goal to eliminate all traffic-related fatalities and serious injuries (also referred to as “Incapacitating Injuries”) in Palm Beach County. One emphasis area of the Vision Zero Action Plan places emphasis on some of the most vulnerable and disproportionately impacted roadway users: pedestrians and bicyclists.

The TPA’s Vision Zero Action Plan (VZAP) Culture Action 3.1 requires the agency to create a quarterly summary of crashes involving a pedestrian or bicyclist to provide understandable information to the public and stakeholders. This policy requires the TPA to provide observations and actions related to fatal crashes within the planning area.

An annual report is published in June of every year providing an overview of the progress towards the goal of zero fatalities and serious injuries on our roadways by 2030. The annual report includes information related to crash trends, research and feedback for future analysis by stakeholders and partners.

Crash Trends to Watch

- April 1 to June 30 (Q2, 2023) had a total of 46 serious injury or fatality related crashes involving people walking or bicycling, a decrease of 23 crashes from Q1 (January 1 to March 31).
- Q1 to Q2 crash patterns typically decline due to seasonal South Florida residents returning to other regions. Nevertheless, 7 more crashes occurred in Q2 in 2023 than in 2022.
- 63% of the crashes were on roads with posted speed limits of 35 mph or above.
- 55% of vulnerable road users crashes occurred on arterial roads, 25% on local roads.
- Crashes involving people walking occurred mid-block (70%) while crashes involving people bicycling were split between midblock (55%) and intersections (44%).
- 24% of crashes involved ageing drivers, which is consistent with previous quarters.
- 46% of the mapped crashes were on the Palm Beach TPA’s High Injury Network (HIN).
- 28% of crashes were within the medium to very high range of the Traditionally Underserved Index in Palm Beach County.

Report Alignment

A. FDOT Strategic Highway Safety Plan (SHSP)

The SHSP is a statewide safety plan developed by FDOT and its safety partners as a framework for eliminating fatalities and serious injuries on all public roads. This framework is the guide for how Florida's traffic safety partners will move toward the vision of a fatality-free transportation system during the next five years. To achieve this vision, this SHSP affirms the target of zero traffic fatalities and serious injuries.

B. FDOT Pedestrian and Bicycle Safety Plan

This Pedestrian and Bicycle Strategic Safety Plan (PBSSP) advances this safety vision by supporting the safety of people walking and biking and aligning with the principles set forth by the Pedestrian and Bicyclist Emphasis Area of the Strategic Highway Safety Plan (SHSP). The PBSSP is charged with implementing this plan and consists of federal, state and local safety partners, stakeholders, and safety advocates.

C. Palm Beach County Local Road Safety Plan and Municipal Safety Plans

The Palm Beach County Local Road Safety Plan (LRSP) is a comprehensive plan that provides a framework for reducing the number of fatalities and serious injuries associated with crashes that occur on Palm Beach County's (hereafter, "the County's") roadway system. The information in this LRSP draws on best practices in safety planning from documents prepared by the Federal Highway Administration (FHWA), the American Association of State Highway and Transportation Officials, the National Cooperative Highway Research Program, the National Highway Traffic Safety Administration, as well as state and local safety partners. The LRSP supports statewide goals and priorities established in the Florida Strategic Highway Safety Plan (SHSP), including Florida's vision of "A Fatality Free Roadway System".

D. Local Governments

To date, 13 municipalities have adopted a Vision Zero Goal, including a target date to eliminate traffic fatalities and serious injuries. The map below indicates the agencies with an adopted Vision Zero Goal in Palm Beach County.

Crash Trends Deep Dive

This deep dive aligns the FDOT's Florida Strategic Highway Safety Plan (SHSP) Emphasis Areas for crashes and the TPA's High Injury Network (HIN) considerations, and other trending topics to summarize the conditions in table. This information is useful when looking at long term crash trends to better determine when crash modification factors may necessitate changes to roadways.

The consecutive pages provide an analysis of Q2's crash conditions with the following three maps:

- **Pedestrian and Bicycle Crashes:** An overall analysis of the pedestrian and bicycle crashes that occurred during the second quarter, broken down by crash severity.
- **Crashes on the High Injury Network within Palm Beach County:** An overlay of the crashes on the HIN within PBC. The corridors on the HIN are based on the roads with the most fatal and serious injuries, as identified on the TPA's 2021 Vision Zero Action Plan. The TPA's HIN has 20 identified intersections and approximately 50 corridors.
- **Crashes on the Traditionally Underserved Index:** An overlay of the crashes on the Traditionally Underserved Index. To maintain consistency with the TPA's 2021 Vision Zero Action Plan, an equity component was analyzed by prioritizing our traditionally underserved communities on areas where residents likely lack transportation access due to demographic conditions, low income, or a historical lack of services.

Moreover, FDOT conducted a review of Florida's traffic safety resources and analysis of crash data to identify the preeminent crash factors by emphasis area. The five emphasis areas identified on FDOT's SHSP are the following: Roadways, Road Users, User Behavior, Traffic Records and Information Systems, and Evolving emphasis areas. This report only includes the top three emphasis areas organized as such: Roadway, Human Behavior, and Socioeconomic Conditions. The TPA's determination for this selection was based on crash frequency and data availability.

TPA Reporting

To track the progress made since updating the TPA's 2021 Vision Zero Action Plan, the following actions were taken by stakeholders during the second quarter to help reach our Vision Zero goal:

- Hosted a Vision Zero Workshop to educate the public, transportation professionals, and elected officials on what Vision Zero is, how local governments can adopt a policy, and next steps to take after policy adoption.
- TPA staff attended Florida's Pedestrian and Bicycle Safety Coalition stay current on the latest pedestrian and bicycle laws, data reporting, and statewide Vision Zero efforts.
- Conducted Walk Bike Safety Audits to identify any pedestrian and bicycle issues at the following locations:
 - Whispering Pines Elementary School in collaboration with the City of Boca Raton and Palm Beach County
 - Palm Springs Community Middle School in collaboration with the Village of Palm Springs, FDOT, Palm Tran, and Palm Beach County
 - Dwight D. Eisenhower Elementary School in collaboration with the City of Palm Beach Gardens and Palm Beach County
 - Glades Rd and I-95 Diverging Diamond Interchange (DDI) to evaluate the effectiveness of the newly constructed interchange with a pedestrian and bicycle perspective and receive valuable feedback on how to improve the design of future DDI's programmed in FDOT's Five-Year Work Program
- TPA staff participated in FDOT D4's Community Traffic Safety Team to help solve local traffic safety concerns and promote public awareness of traffic safety best practices.

The TPA will continue to encourage agencies to develop comprehensive roadway safety action plans and utilize resources and grants available to develop such materials.

Background Information and Sources

The TPA works collaboratively with Palm Beach County (PBC) and the Florida Department of Transportation (FDOT), as well as municipalities and other strategic partners to align strategies and funding within programs to eliminate crashes that result in a serious injury or fatality. This effort aligns the TPA's goals with those of others, identified below:
