

# LONG RANGE TRANSPORTATION PLAN

## WHAT IS VISION 2050?

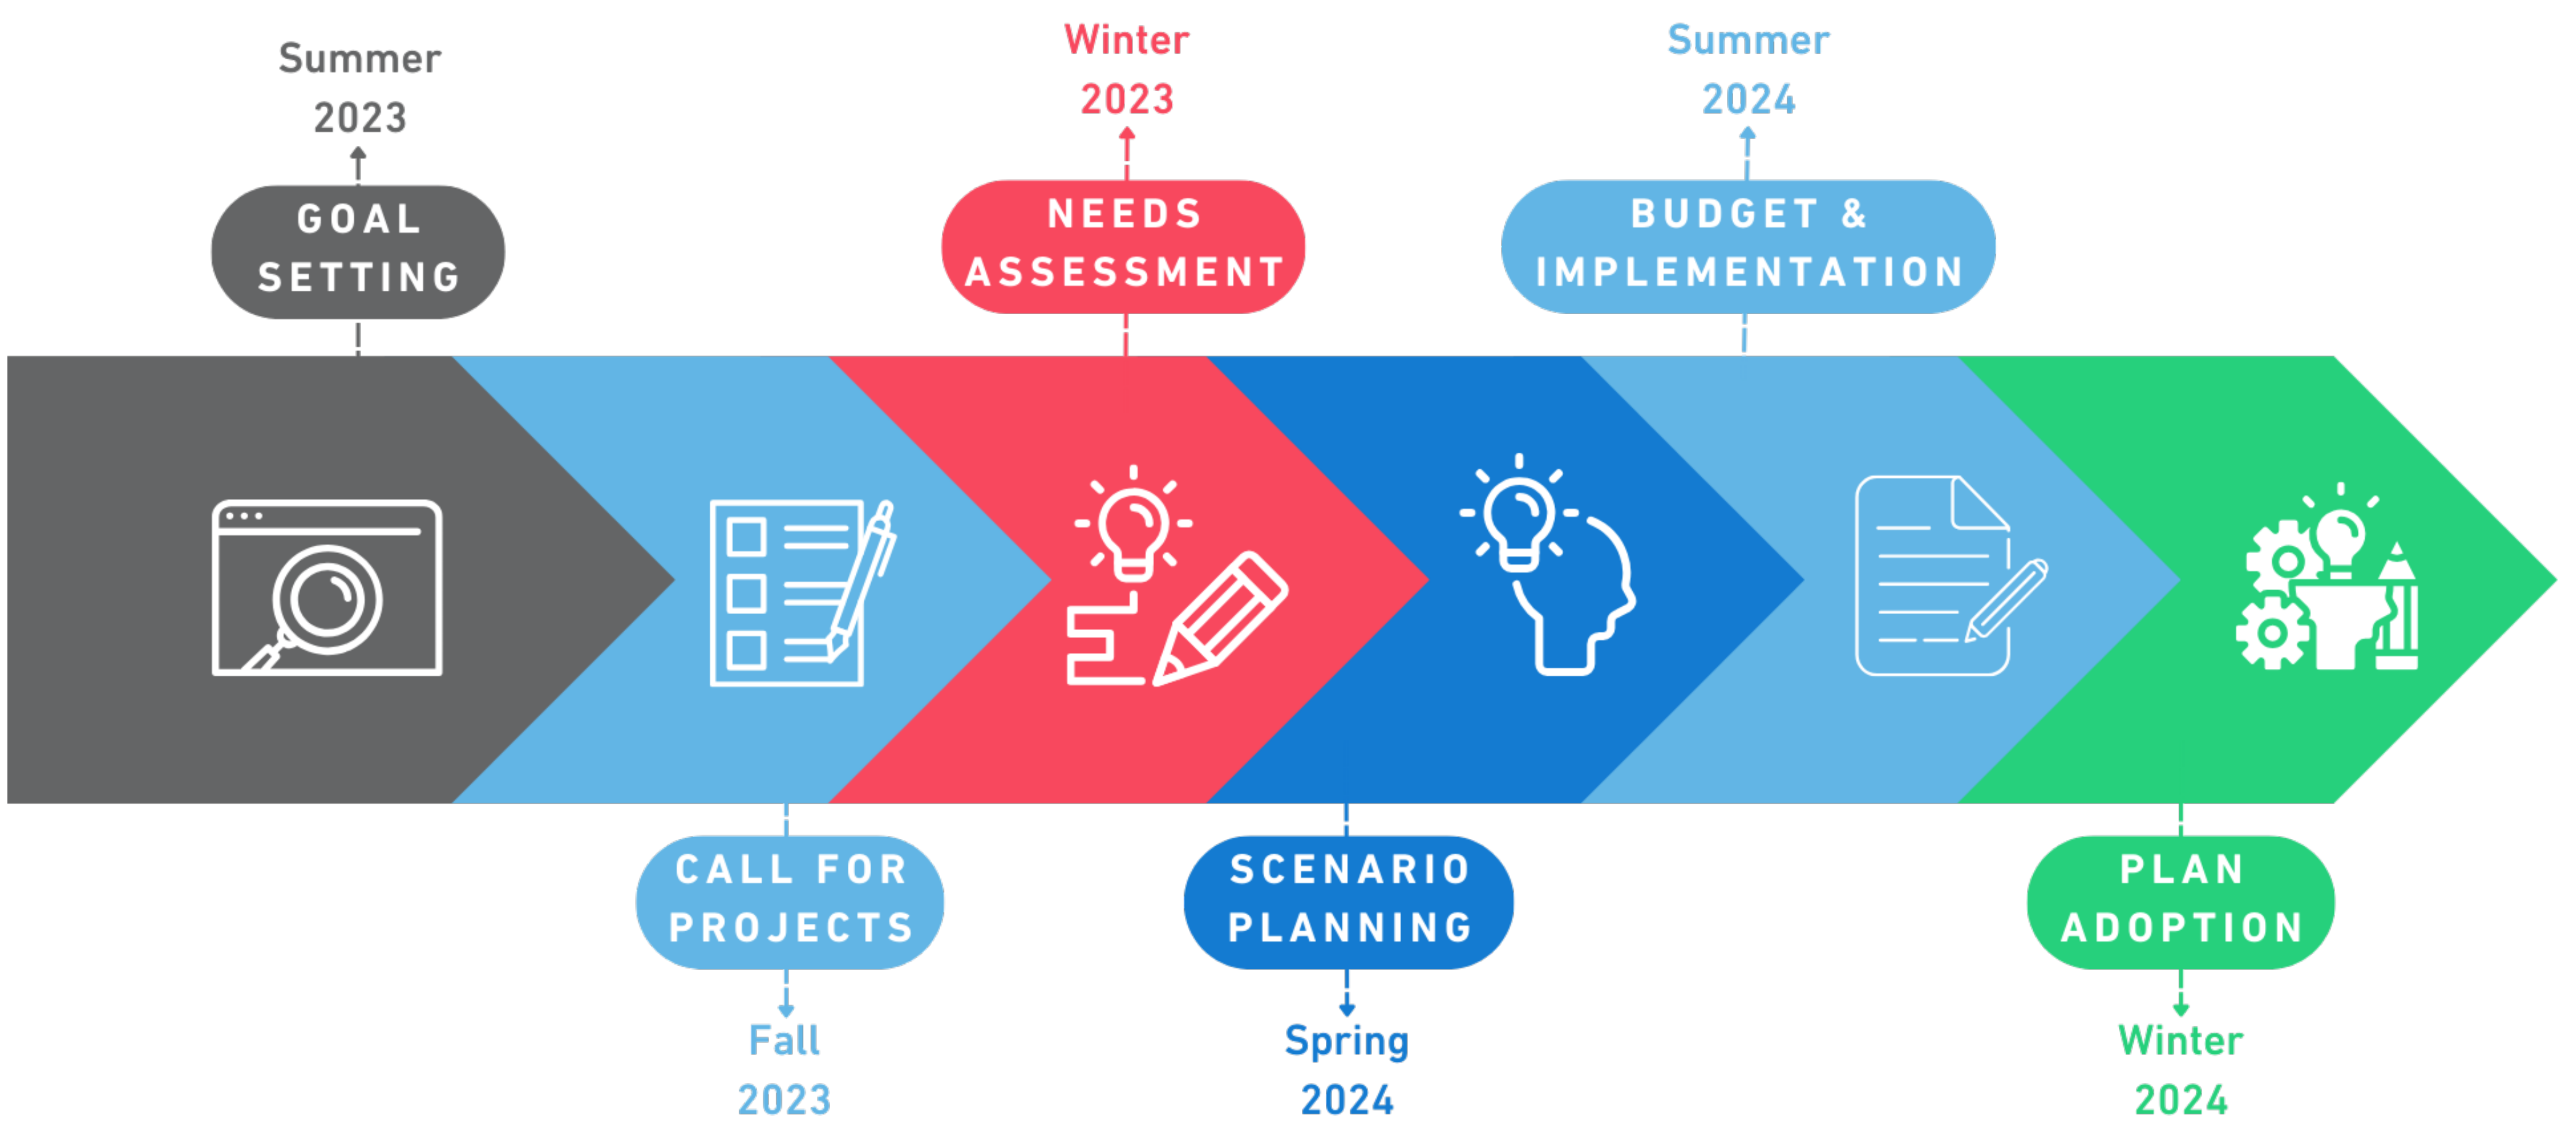

Together, we are planning for Palm Beach County's future. As our county grows, our transportation system must evolve. Here's how we do it!

Vision 2050 is the Palm Beach County region's Long Range Transportation Plan (LRTP). This plan provides a blueprint for what our transportation system will look like in 25 years. With public input, the LRTP evaluates county and municipal needs, our current transportation network, and investments to improve how we move around the county.

## ABOUT THE TPA

The Palm Beach Transportation Planning Agency (TPA) plans, prioritizes, and funds our transportation system.

We work with local leaders, transportation partners, regional stakeholders, and community organizations to create a safe, efficient, and connected transportation system for everyone in Palm Beach County.
